***** Notes of Significance *****

Evening Brief

Date/Time Stamp: Saturday June 24, 2017 10:40 PM

Weather Summary

...Lightning and Wind Returns to Western and Northern NV into ID/UT Sunday/Monday...

Temperatures will cool slightly, but still remain well above normal over much of Nevada, the Arizona Strip and Southern Utah through the weekend.

Drier air will continue to move from north to south through the area today and Saturday, meaning that thunderstorms will be pushed east of the area, with the exception of continued afternoon/evening isolated thunderstorms over the Central Sierras. A couple storms may creep into far western Nevada in Mineral County, but other areas will remain dry. Otherwise, light to moderate N-NE winds will continue across the Basin.

Preparedness Levels

Current:

Great Basin	3
National	2

Great Basin Fire Activity: Light Initial Attack

New Fires and Acres: 15 fires for 517.9 acres / 7,148 acres Large Fire Growth

Current Incident Details Todays Activity (from WFDSS):

Great Basin
Coordination Center

Resources:

- Crews; 22 T1 IHCs in GB, 18 committed, 2 Available and 2 R&R.
 - T2 IMT Team 4 – Roide – Committed to Brianhead fire.
 - T1 IMT Team 2 - Martin – In-brief tonight @ 2000.
 - Local IA resources are at drawdown for UT and NV.
 - GBCC has 3 loads of Smokejumpers available in McCall and Elko.
 - T1 helicopters are all committed. 2 T2 helicopter available GACC.
-

Great Basin Fire Potential Summary

Fine fuels, which have been the main contributor to fire spread early this season, continue to dry out quickly across the Great Basin especially in areas that have remained very dry. Higher than normal fuel loading and continuity exists over the northern half of the Great Basin. ERCs have now climbed to the 80th-95th percentile over southern NV/UT and the AZ Strip, with more advanced fire behavior on ongoing fires in southern Utah.

For more detail, see [Great Basin 7-Day Fire Potential Outlook](#)
